

Technip awarded a front-end engineering design contract for a grassroots refinery in Qatar

August 27, 2007

Paris, August 27, 2007

Technip has been awarded by Qatar Petroleum a lumpsum front-end engineering design (FEED) contract, valued at \$200 million, for the design and construction of a 100,000 bpd grassroots refinery in Qatar. The contract is awarded to TechnipFMC, a joint venture between Technip and FMC Technologies. The refinery is expected to be operational in 2010.
